

2009 Annual Report Bureau of Farmland Preservation

Miller Farm, Berks Co.

COMMONWEALTH OF PENNSYLVANIA

DEPARTMENT OF AGRICULTURE | RUSSELL C. REDDING, SECRETARY

May 2010

Dear Friend of Pennsylvania Farmland Preservation -

Over the past two decades Pennsylvania has permanently protected nearly 4,000 farms in perpetuity, making us the national leader in the preservation of agricultural land. Knowing that agriculture is the economic backbone of the commonwealth – with one in seven jobs related to farming and gross receipts totaling \$6.1 billion – this work to preserve the land that sustains us means much more than protecting open space. These efforts are vital to our future ability to feed our state and our nation, and to protect natural resources, from local streams to the Chesapeake Bay.

Since its inception in 1988, the program has experienced overwhelming public support – not just in farming regions, but in suburban and populated areas as well. Most recently, the Growing Greener 2 initiative, which provided \$80 million for the program, achieved victory by wide margin in May 2005. In addition, several of the 57 established county programs are funded by county bond referendums. Pennsylvanians have embraced farmland preservation, and our farmers continue to take advantage of this support, as evidenced by the extensive waiting list for those who wish to enter into this program.

Public support, strong federal, state and local partnerships and commitment to those families who have preserved their farms are the keys to the program's future success. In June 2010, the state Farmland Preservation Board will preserve its 4,000th farm, yet we know the work does not end when the farm is preserved. It is a priority for the department to ensure that preserved farm owners have the tools necessary to remain profitable today and for future generations. Education and preservation must go hand-in-hand, and the department will provide this support through special workshops by the Center for Farm Transitions and focused meetings and trainings about programs such as the Agricultural Security Area, Clean and Green, and ACRE.

This report of the Bureau of Farmland Preservation is intended to provide you with an overview of the state's activities in 2009. More importantly, this document outlines our commitment to keeping Pennsylvania growing – one preserved farm at a time.

Sincerely,

A handwritten signature in blue ink that reads "Russell C. Redding".

Russell C. Redding

Overview

Pennsylvania is home to 7.8 million acres of farmland, from which the state’s 63,000 hardworking farm families provide safe and affordable food, fiber and fuel to people throughout the world. Agriculture is the state’s leading economic enterprise, with the sale of agricultural products contributing \$6.1 billion to the economy each year. Additionally, one-in-seven jobs are related to agriculture, accounting for approximately 14 percent of the state’s employment opportunities. This vibrant agriculture industry is a reflection of Pennsylvania’s agrarian heritage, but more importantly it represents a growing and evolving industry that will play a critical role in Pennsylvania’s future. Viable agricultural lands are fully developed for

production and should not be considered a temporary land use. Critical to the future of our agricultural industry and our ability to produce food and fiber for our citizens is the preservation of the farmland that sustains us. As farmers face increased development pressures and economy-driven financial stresses, the challenge to keep land in production agriculture grows.

The Pennsylvania Department of Agriculture's Bureau of Farmland Preservation exists to ensure Pennsylvania's number one economic enterprise continues to thrive by administering programs that keep prime agricultural lands available for production agriculture in perpetuity – forever. The decision to preserve a farm in perpetuity is an enormous commitment that nearly 4,000 Pennsylvania farm families have made to date.

With a staff of three full-time and two part-time individuals, the bureau provides administrative and technical support to 57 county farmland preservation programs and oversees the distribution of funds set aside for preservation purposes.

By June 2010, it is projected that more than 436,000 acres will be approved for permanent preservation through 4,012 agricultural conservation easements. The Pennsylvania Agricultural Conservation Easement Purchase Program leads the nation in number of acres preserved and continues to preserve farmland at a faster rate than any other state. In 2009, 232 farms were preserved by permanent agricultural easements.

A preservation milestone of 425,000 acres was reached in 2009. In June of 2010, the state board will approve its 4,000th farm. Additionally, Berks, Bucks, Franklin and Lebanon counties met the following acreage milestones:

- Berks County – 60,000 acres preserved
- Bucks County – 10,000 acres preserved
- Franklin County – 15,000 acres preserved
- Lebanon County – 15,000 acres preserved

Farmland Preservation Highlights under Governor Rendell's Administration

Governor Edward G. Rendell's leadership over the past eight years has been instrumental in moving Pennsylvania forward as a national leader in farmland preservation. The following is a timeline of milestones and notable achievements under the administration:

- 2002-2009 - Preservation of 218,618 acres on 2,198 farms;
- March 2003 - 250,000 acres preserved milestone;
- November 2004 - The Ray and Barbara Seidel farm in Berks County became the 2,500th farm preserved in Pennsylvania;
- December 2006 - The Larry and Constance Breneman farm in Lancaster County became the 3,000th preserved farm in Pennsylvania;

-
- May 2005 – Pennsylvanians approved the Growing Greener 2 County Environmental Initiative Program, providing \$80 million to the farmland preservation program and greatly accelerating the rate of preservation. Funds contributed to the preservation of 33,713 additional acres;
 - In 2006, Pennsylvania allocated \$102 million for the purchase of easements. This is the single highest allocation of funds in the program's history;
 - In 2006, participating counties appropriated a record \$45 million for the purchase of easements;
 - April 2007 – Pennsylvania reached the 350,000 acres preserved milestone by preserving the Fred and Grace Yearick farm in Clinton County;
 - At the October 19, 2007 state board meeting a total of 75 farms were permanently preserved. This number represents a new record for number of easements approved at a single State Board meeting;
 - April 2008 – the Marcus Bortz farm in Westmoreland County became the 3,500th farm preserved in Pennsylvania;
 - August 2008 – Pennsylvania reached the 400,000 acres preserved milestone by preserving the Graver Farm in Northampton County;
 - December 2009 – Pennsylvania recognized the preservation of 425,000 acres during the state board's regularly scheduled meeting; and
 - June 2010 – State board anticipates the preservation of its 4,000th farm on the Charles, Susan and Cynthia Zimmerman Farm in Lebanon County.

Bureau Activities

The bureau reviews easement recommendations for state board approval, provides guidance to counties on issues related to preserved farms, and facilitates outreach to many stakeholders. The bureau continued its public information and training efforts in 2009. At the conclusion of State Agricultural Land Preservation Board meetings, the bureau conducted a series of round-table meetings for county administrators and board members to communicate issues surrounding farmland preservation. The continuation of these discussions is already underway in 2010. Additionally, the third edition of *"A Guide to Farmland Preservation"* remains available to county administrators, assuring the most up-to-date, accurate and easily understandable information is available. The bureau is also moving forward with efforts to automate its easement purchase recommendation submittal system to make processing more efficient and less costly, with a target completion date of late 2010. Currently, the process of preserving a farm through the program requires a significant amount of paperwork. When complete, the project will reduce paperwork and result in a cost savings for the commonwealth and counties.

The bureau is empowered through the Farmland Preservation Program, Act 149 of 1988, as amended. Section 14.4 of Act 149 requires the State Agricultural Land Preservation Board to describe all relevant activities of the program for the preceding calendar year in an annual report.

This report covers the activities of the bureau and board from January 1 – December 31, 2009.

Program Implementation

The Pennsylvania Agricultural Conservation Easement Purchase Program was developed in 1988 to help slow the loss of prime farmland to non-agricultural uses. The program enables state, county and local governments to purchase conservation easements, sometimes called development rights, from farm owners. The first easements were purchased in 1989.

Counties participating in the program have appointed agricultural land preservation boards. A state board is responsible for distribution of state funds, approval and monitoring of county programs, boards and specific easement purchases.

An Agricultural Security Areas (ASA) designation is a tool for strengthening and protecting quality farmland from the urbanization of rural areas. An ASA qualifies land for consideration under the easement purchase program at the landowner's request if the ASA has at least 500 acres enrolled.

In addition to being part of an ASA, farms considered for easement purchase must be harvested cropland, pasture or grazing land. Farms are evaluated by county officials according to soil quality, stewardship and development pressure. Each farm is ranked and placed on a waiting list according to its ranking. Approximately two-thirds of the farms on the list do not get preserved due to funding limitations, accounting for an estimated 2,000 farms and more than 200,000 acres.

In 2009, the State Agricultural Land Preservation Board met five times to consider individual easement purchases submitted by 47 of the 57 counties participating in the farmland preservation program. The state board approved for purchase 232 easements of various ownership combinations – state, county, local government and non-profit.

In June of 2010, the program will reach 4,000 preserved farms, a milestone that would not have been reached without the administration's championing of the Growing Greener 2 County Environmental Initiative. The Growing Greener 2 bond was approved overwhelmingly by voters in May of 2005. The initiative has resulted in the commonwealth investing \$625 million toward environmental concerns; including \$80 million for farmland preservation. Growing Greener 2 greatly accelerated the rate of easement purchases. Funds contributed to the preservation of 33,713 additional acres.

Of the 57 counties eligible to participate in the program, 51 appropriated \$27.7 million in local matching funds for the 2009 calendar year (Figure 1). The state board approved an easement purchase threshold of \$23 million for 2009. (Figure 2) (Table 1)

Funding

Pennsylvania's farmland preservation program purchases development rights of farms through conservation easements. The easements allow property owners to

retain title, pass the property on to heirs, or sell the property, while still maintaining agricultural use of the land. Farmers may choose to receive the proceeds from easement sales in a lump sum payment, installments over a period of five years, or on a long-term installment basis. Many farmers use the proceeds from easement sales to reduce debt loads, expand operations and as a financial resource that can help assure the transition of the farm to the next generation.

To purchase these easements and secure land for Pennsylvanians to farm in the future, a source of funding for the conservation easement purchase program was dedicated in July 1993 with the collection of a percentage of a two-cent tax on each package of cigarettes sold in Pennsylvania. In 2002, the provisions of the cigarette tax revenue were changed to provide greater program fund stability by setting aside a flat appropriation. As a result, approximately \$20.5 million per year is now earmarked for the preservation of farmland, and concerns about the sustainable nature of the cigarette tax revenues for the program have been eliminated.

In 2005, the farmland preservation program was granted a second dedicated funding source, with 14.8 percent of the proceeds of the Environmental Stewardship Fund made available each year for the purchase of easements. The reallocation of these funds to include farmland preservation was in coordination with the Growing Greener 2 initiative. In 2009, the Environmental Stewardship Fund provided \$5.9 million to the farmland preservation program.

The total investment in farmland preservation in 2009 was \$55.5 million - including federal, state, county and local dollars.

Under the provisions of Act 96 of 1994, the funding formula for county allocation of funds was revised. Instead of funding all 67 counties in the commonwealth, the allocation of funds is now available only to those counties having programs approved by the State Agricultural Land Preservation Board by January 1 of each year. In 2009, 57 counties received allocated funds for easement purchase.

In 2009, many of the 57 counties appropriated funding for preservation purposes, totaling \$27.7 million. Counties that set aside funding received a state match based on a funding formula. All of the counties with approved programs received a state grant. The state's total allocation was \$23 million in 2009.

As previously stated, the Growing Greener 2 funds provided a significant increase in program spending. In 2006, \$65 million was included in the state spending threshold; in 2007, \$4 million was included; and \$9.52 million was made available to counties through block grants. The remaining \$1.48 million was used toward the 2008 spending threshold. All Growing Greener 2 funds have been spent or obligated.

Public Information and Training

The Pennsylvania Department of Agriculture's Bureau of Farmland Preservation is committed to protecting the state's farmland from irresponsible development. Part

of this commitment involves empowering county programs with accurate information and readily-available resources to submit easement purchases to the State Agricultural Land Preservation Board for approval.

The bureau's staff members support the 57 counties with approved programs by interpreting legislation, providing sample documents, meeting with appraisers, reviewing easement documents and giving administrative guidance.

In 2009, several one-on-one training sessions were conducted for newer county administrators in Harrisburg. A state board member orientation session was held in December to discuss current program issues and duties of the board. The bureau attended and participated in other meetings held by the Pennsylvania Farmland Preservation Association, an organization comprised of county farmland preservation program administrators who are dedicated to promoting and enhancing the interests of agricultural land preservation in the state.

The third edition of *"A Guide to Farmland Preservation"* was updated and distributed to counties last year. The revised book features instructional text and document examples in a more user-friendly format than previous editions. In addition to being provided to state board members and county administrators in print, the guidebook is available to the public on compact disk or on the department's Web site at www.agriculture.state.pa.us.

To improve efficiency and reduce administrative costs associated with the farmland preservation review and approval process, the bureau continued working on a project to automate the easement purchase recommendation process in 2009. The process will be modified to include the use of a Web-based program to complete and file forms with the bureau for review and the state board for approval. The new program will eliminate excessive paperwork, reducing costs and maximizing efficiency.

In 2009, the Bureau of Farmland Preservation continued hosting round-table meetings following state board meetings for county administrators and board members. Topics for discussion included:

- Formula used for distributing funds to participating counties;
- Nutrient credit trading with guest speaker Pat O'Connell, Evergreen Capital Advisors;
- Monitoring and enforcement of preserved farms;
- Importance of land use planning with guest speaker, Pulitzer Prize winning author of *"Save Our Lands, Save Our Towns"*, Thomas Hylton; and
- Transitioning preserved farms with guest speaker Dennis Hall, Center for Farm Transitions.

Bureau staff provided public outreach at the 2009 Pennsylvania Farm Show in Harrisburg, and Penn State's Ag Progress Days in Rock Springs, Centre County.

In 2009 the Bureau taught several Clean and Green program classes to county tax assessors at regional and statewide conferences. In addition, the Bureau facilitated a public meeting on Clean and Green in Bedford County with several hundred landowners in attendance.

Marcellus Shale Gas Leasing and Drilling and Alternative Energy Production

Under much of Pennsylvania's fertile farmlands lies large amount of natural gas. The Marcellus Shale Natural Gas Field Formation extends through Pennsylvania, New York, Ohio and West Virginia, and lies 5,000 to 8,000 feet below the surface. According to a Pennsylvania State University study, this formation could hold 363 trillion cubic feet of recoverable natural gas from the 31-million-acre core area of the Marcellus region; the United States consumes 23 trillion cubic feet of natural gas annually.

Owners of property who have sold their development rights under Pennsylvania's farmland preservation program retain the right to enter into oil and gas leases. This allows for the construction of roadways and other infrastructure necessary for the removal of oil and gas from the property. Property owners are encouraged to notify the county farmland preservation board when they receive offers to enter into gas leases. The county board can provide information regarding what terms to protect farmland have been included in other leases in the county and financial compensation.

The "Clean and Green" Law (Act 319 of 1974) does not directly address the consequences of entering into oil and gas leases for exploration and development. The imposition of rollback taxes and penalties could result in the landowner being required to repay significant rollback amounts to the county tax assessment office. Landowners should consult with the county tax assessment office before entering into a lease to understand the consequences. In many cases, a landowner may be able to negotiate terms into the lease that require the company to be responsible for any rollback penalties. Several bills, including Senate Bill 298 and House Bill 1394 were introduced in 2009 to address this issue as it relates to enrolled land.

In addition to providing guidance on issues related to Marcellus shale gas leasing and drilling, the bureau also fielded inquiries from county administrators and farm owners on activities related to alternative energy; including biomass, solar and wind energy. Most county farmland preservation programs permit farm based renewable energy if the majority of the energy is used on the farm. Several county programs were amended in recent years to permit farm based renewable energy even if the majority of the energy is sold, provided any associated structures are located within the existing farmstead land.

Clean and Green Program

The effect of Clean and Green on the overall farmland preservation effort is widespread and immeasurable. Affordable property taxes are essential to

maintaining viable farms. In its 35 year history, the program has been vastly successful in achieving this goal.

The Pennsylvania Farmland and Forest Land Assessment Act (Act 319), referred to as the Clean and Green Act, was signed into law in 1974. The act protects farmland, forestland and open space by allowing for land taxation according to its use-value rather than the prevailing market value.

Enrolled land is assessed according to the income approach to land appraisal, the amount of income the land is capable of producing at its highest and best agricultural use. The trend in recent years has been for the use values to increase. The county may establish use values that are less than the department's.

The program has widespread participation, with 9.3 million acres enrolled statewide. The average reduction in fair market assessed value for enrollees is nearly 50 percent – a great incentive to keep the land undeveloped. The program is voluntary and generally requires a minimum of ten acres remaining in one of three designated use categories – agricultural, agricultural reserve, and forest reserve.

Agricultural use describes land used to commercially produce agricultural commodities. **Agricultural reserve** includes noncommercial open space land used for recreation and scenic enjoyment that is open to the public free-of-charge. **Forest reserve** describes the use of 10 acres or more of forested land capable of yielding timber or other wood products.

Land removed from its designated category for a non-permitted use becomes subject to a roll-back tax imposed for up to seven years, plus six percent interest. Certain land divisions and conveyances are exempt from roll-back penalties if the original use of the land does not change.

County assessment offices administer the act at the county level. The bureau provides for uniform interpretation of the act among county assessment offices and distributes use values by May 1st of each year. County assessors are required to annually submit information on the extent of Clean and Green Act participation within their counties to the department. To facilitate this process, the department surveyed each county on their Clean and Green activity. The findings from this survey are the basis of this report. A copy of the survey form used to gather this information is included as Exhibit A.

This section represents the results of the 2009 survey.

Administration

The 2009 survey forms were mailed to all 67 counties, all of which responded to the survey. Fifty-five counties, or 82 percent, participated in the Clean and Green program. Table 6 depicts those counties reporting participation during 2009.

Table 7 summarizes the statistical data of participation. The number of parcels reported enrolled by each county in 2009 was 171,110; the acreage enrolled was reported as 9,324,604.

Table 8 indicates the acres terminated in each category of eligibility. The most common reasons for termination and removal of enrolled land include: a split-off/subdivision between two and ten acres; a change in use of the enrolled property that is inconsistent with the eligibility requirements; sale of enrolled property for residential development; establishment of a commercial activity not consistent with the allowable rural enterprise; and posting land enrolled in the agriculture reserve category.

Table 9 lists the number of applications rejected per county for reasons such as not meeting requirements, too little acreage, late filing, non-conforming use, inability to verify ownership, or failure to show \$2,000 anticipated gross income. It lists the number of violations cited for reasons such as property split-offs, non-conforming subdivisions, change in use, transfer of land, and voluntary rollbacks.

Table 10 lists the Rollback Tax Summary. It details the dollar amount received as rollback taxes and the dollar amount received as interest on the rollback taxes. Act 319 requires that all the interest received on rollback taxes shall be added to other local money appropriated by an eligible county for the purchase of agricultural conservation easements. If the county does not participate in the easement program, the interest shall be forwarded to the state agricultural conservation easement purchase fund.

Table 11 lists the manner in which Act 319 use-values were determined by the responding counties. The Department of Agriculture provides county-specific use values annually. The county has the option of establishing a base year to calculate the preferential assessment, using the department provided use values, or determining a lower use county value.

Table 11 also lists how counties assess the forest reserve county average values. The Department, with assistance from the Department of Conservation and Natural Resources Bureau of Forestry, provides values based on the average value of timber in a particular county and the average value of six timber types.

Federal Farmland Protection Program

The Federal Farm and Ranchlands Protection Program, or FRPP, works through existing government programs, including the Bureau of Farmland Preservation, to help preserve prime and unique farmland. The program reimburses land owners up to 50 percent of the fair market easement value. This allows counties to preserve additional farms on their waiting lists that may have otherwise not been preserved with only state, county and municipality funding.

In 2009, the Pennsylvania's farmland preservation program received more than \$4 million in funding from the Federal Farmland Protection Program (FRPP). More than

3,000 acres on 19 farms in 10 counties were selected to participate in the program in 2009.

Since 1996, FRPP has provided more than \$23 million in funding to the state easement purchase program in Pennsylvania. This funding was utilized to preserve more than 32,000 acres throughout the commonwealth. (Figure 3)

The 2008 Farm Bill made changes to FRPP to make the allocation process more efficient. The changes will allow eligible entities to be certified to use funds pursuant to program guidelines rather than requiring them to go entirely through the Natural Resources Conservation Service. The Pennsylvania Department of Agriculture worked with the U.S. House of Representatives Committee on Agriculture to incorporate these changes.

Century & Bicentennial Farm Programs

Pennsylvania's Century and Bicentennial Farm programs are aimed at emphasizing the importance of our economic and rural heritage and traditions. The programs demonstrate the importance of agriculture, specifically the family farm, to all citizens of the commonwealth.

The Century Farm Program recognizes farms that have been in the same family for 100 years or more. Owners of farms recognized with this designation are presented with a certificate from the Secretary of Agriculture. Information supplied by the applicants are filed in the archives of the Pennsylvania Historical and Museum Commission.

The Bicentennial Farm Program was created in 2004 to recognize farms that have been in the same family for 200 years or more. The bicentennial farm program is ruled by similar standards as the century farm program.

In 2009, 18 Century Farms and six Bicentennial Farms were recognized. Four of these designations were presented to families at the 2009 Pennsylvania Farm Show and four were presented at Penn State's Ag Progress Days. To date, the Department of Agriculture has recognized 2,002 century and bicentennial farms.

Grant Programs

Agricultural Land Conservation Assistance Grant Program

Act 99 of 1994 authorized up to \$750,000 in proceeds from the sale of state-owned farmland to establish an Agricultural Land Conservation Assistance Grant Program. The program is designed to assist counties with farmland preservation programs in developing Geographic Information Systems (GIS); effective agricultural zoning ordinances; and contracting with consultants (i.e. technicians to monitor soil

conservation plans or providing financial implication workshops as a service to applicants). All grants must be used to improve the functioning and effectiveness of county programs.

The grant assistance program provides matching grants up to \$10,000 to eligible counties. A county is not eligible for more than a cumulative total of \$25,000 in grants under the program.

No grants were awarded in 2009. There is a remaining balance of \$198,218.75 in the program account.

Land Trust Reimbursement Grant Program

In addition to the state's Bureau of Farmland Preservation, nonprofit organizations called "land trusts" operate throughout Pennsylvania to ensure land with special natural or public values is not developed. To support this effort and to accelerate the state's farmland preservation activity, Act 46 of 2006 established the Land Trust Reimbursement Grant program.

The grant authorizes the Pennsylvania Agricultural Land Preservation Board to allocate up to \$200,000 annually from the Agricultural Conservation Easement Purchase Fund for reimbursement of expenses incurred in the acquisition of agricultural conservation easements. The grant covers expenses including appraisal, legal services, title searches, document preparation, title insurance, survey and closing.

Twenty-three land trusts are registered with the state board. As of December 2009, the board awarded \$1,088,314 to 11 conservancies for expenses incurred through the preservation of 17,656 acres. (Table 5)

Program Participation

The remainder of this annual report consists of tables, graphs, and explanatory text that respond directly to the requirements of Section 14.4 (Legislative Report) of Act 149 of 1988, the Agricultural Area Security Law. Subsection titles are keyed to the numbered paragraphs of Section 14.4.

Agricultural Security Areas (ASA's)

Location of the ASA's

A list of all ASA's known to the Department of Agriculture is contained in Table 1. ASA's are listed alphabetically by county and township. Data in Table 1 is obtained from a variety of sources, usually township secretaries, and may not reflect exact totals.

The Agricultural Area Security Law, as amended April 13, 1992, P.L. 100, No. 23, provides that the Secretary of Agriculture shall be notified by the governing body within 10 days of the recording of an ASA.

In 2009, Six townships were designated as ASA's, bringing the state totals to 978 ASA's in 65 counties in Pennsylvania.

The location of agricultural conservation easements is contained in Table 2. The first two columns list the farmer's name and the county where the easement is located.

Number of Acres in the ASA

In 2009, 16,759 acres were assigned to ASA's, making the total ASA acreage enrolled 3,801,038 acres.

Conservation Easements

Number of Acres Subject to Conservation Easements

In 2009, 21,556 acres were placed under agricultural conservation easements. A total of 428,708 acres has been placed under agricultural conservation easements in the commonwealth since the program began under the authority of Act 149 of 1988. All the easements have been purchased as perpetual.

Number of Easements

At the end of 2009, 3,928 easements have been purchased in the State under the authority of Act 149 of 1988. There may be other agricultural conservation easements in the commonwealth, but they have not been purchased under the authority of Act 149 and their existence is not reported to the Department of Agriculture. The reported easements are specifically divided into 788 county-owned, 1,340 Commonwealth-owned, 1,722 jointly-owned agricultural conservation easements, 63 multi-funded easements and 15 easements funded jointly between a county and non-profit or local municipality.

Number and Acres in Each Conservation Easement

Table 2 lists the number and acres for each easement purchased during the reporting period. There were 232 easements with 21556 acres purchased in 2009. There were 223 lump-sum payment purchases, accounting for 96 percent. There were 125 bargain sale agreements, or 54 percent at an average of 79 percent of the easement purchase price. A bargain sale is acquired when the easement is purchased at less than 100 percent of the appraised easement value.

There were five like-kind exchanges or 2 percent, and 9 regular installment sales, or 4 percent. Six of the nine regular installments received 0% interest. The average interest rate for the three remaining regular installments was 2.3%.

Number and Value of Easements Purchased in the Preceding Calendar Year by Commonwealth, jointly with Counties, and multi-funded with Counties and Municipalities

1. Commonwealth-Owned Conservation Easements

The value of each easement purchased under the program this reporting period is given under column 4 of Table 2. The next two columns present

additional costs in acquiring the easements and the "Total Costs" column represents the sum of the three columns.

Fifty-two commonwealth-owned easements were purchased in 2009, covering 5,044 acres with an easement value of \$17,787,026.

2. Joint Commonwealth/County-Owned Conservation Easements

The value of each easement purchased under the program this reporting period is given under column 4 of Table 2. The next two columns present additional costs in acquiring the easements, and the "Total Costs" column represents the sum of the three columns.

There were 102 state and county "jointly-owned" easements covering 10,460 acres purchased in 2009. These easements represent a value of \$29,292,709.

3. Multi- Commonwealth/County/Township-Owned Conservation Easements

In 2009, eight "multi-owned" easements totaling 522 acres were purchased by the commonwealth, counties and townships. These easements have a total value of \$7,698,628.81.

Participating Counties

All counties eligible to participate in the 2009 allocation of funds process are listed on Table 3. Counties listed on Table 3 have an appointed board and are implementing programs. All counties with county boards also have approved programs. Fifty-seven counties have actually purchased conservation easements.

County Annual Appropriation

The 2009 appropriations made by counties are listed in Table 3, column 2, "County Approp." The total county appropriation among 57 counties is \$27,664,184. Figure 1 shows the total county appropriation amounts from 1989-2009.

Characteristics of 2009 Preserved Farmland Quality of Farmlands Subject to Easement

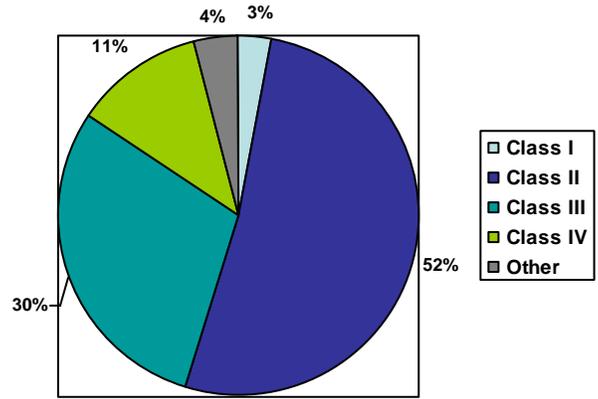

Data was collected on the soil classification, crop types, acreages and yields, livestock types and numbers for each farm on which an easement was purchased from January 1, 2009 to December 31, 2009.

In summary, there were 21,556 acres of land placed under easement during this reporting period.

National Resources Conservation Service (NRCS) soil classifications of this land are:

- Class I – 661 acres
- Class II – 11,161 acres
- Class III – 6,402 acres

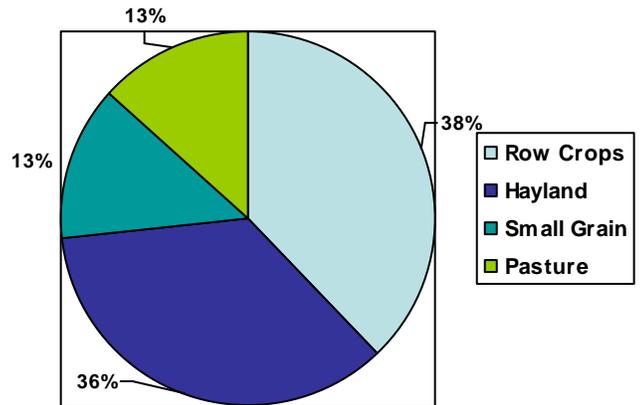

- Class IV – 2,465 acres
- Other Classes (V-VIII; ponds, wetlands or other lands not broken down by county) – 867 acres

***Soil classes I-IV are well-suited for agricultural production.

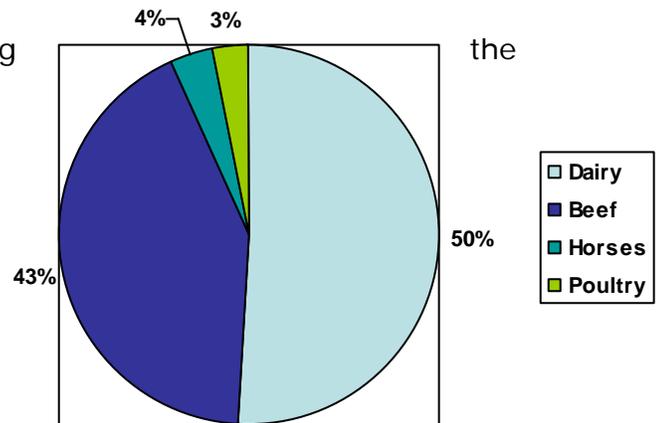

The following are the acres of the major crops grown on the 232 farms preserved:

- Row Crops – 8,140 acres
- Hayland – 7,667 acres
- Small Grain – 2,852 acres
- Pasture – 2,897 acres

The numbers of farms under easement supporting following primary livestock operations:

- Dairy – 68 farms
- Beef – 57 farms
- Horses – 5 farms
- Poultry – 4 farms

Nature and Scope of Development Activity

The likelihood of development was generally moderate to high in the areas where agricultural conservation easements were purchased. These areas were primarily zoned rural residential, agricultural, or conservation district. Agricultural zoning occurred in approximately 50 percent of the areas under easement purchase. Public sewer and water is available or is planned in approximately 25 percent of the preserved area.

Conservation Practices on Farms Subject to Easement

The summary that follows presents the frequency of use of conservation practices and best management practices on farms where conservation easements were purchased in 2009. All the farmers have developed conservation plans for their farms and are in various stages of implementation. Annual inspections conducted by the counties will report on the progress being made by farmers toward implementing their conservation plans.

SUMMARY OF CONSERVATION PRACTICES ON FARMS WITH CONSERVATION EASEMENTS

<u>CONSERVATION PRACTICES</u>	<u>NUMBER OF FARMS</u>	<u>PERCENT OF TOTAL FARMS w/EASEMENTS</u>
Conservation Tillage	167	72
Contour Farming	160	69
Crop Rotations	139	60
Crop Residue Use	93	40
Cover Crops	95	41
Diversions	51	22
Streambank Protection	30	13
Strip Cropping	160	69
Subsurface Drainage	23	10
Terraces	19	8
Water Control Structures	21	9
Waterways	118	51
Animal Waste Storage	91	39
Nutrient Management System	93	40
Pasture and Hayland Management	151	65

Recommendations for the Purchase of Agricultural Conservation Easements

The total number of recommendations filed this reporting period by counties is the same as the number approved by the state board (232). None have been disapproved.

Conclusion

Implementation of the Farmland Preservation Program over the past year has resulted in the permanent preservation of 21,556 acres of agricultural land on 232 farms in 47 counties. The total cost of this protection was approximately \$75.9 million. The average price per acre was \$3,436.

Farmers have requested and gained municipal government approval of agricultural security areas protecting farming on more than 3.8 million acres of land. Of the 57 eligible counties 51, or 89 percent, appropriated local money for farmland preservation during the 2009 calendar year, amounting to more than \$27.7 million.

Pennsylvania's Farmland Preservation Program remains a shining example of what is accomplished through successful partnerships between all levels of government and non-profit entities, and has become a national model for success.

State Agricultural Land Preservation Board

December 31, 2009

The Honorable Russell C. Redding, Chairman and Secretary, Department of Agriculture

John Hanger, Secretary, Department of Environmental Protection

George E. Cornelius, Secretary, Department of Community & Economic Development

The Honorable Michael Brubaker, Senate of Pennsylvania

The Honorable Michael A. O'Pake, Senate of Pennsylvania

The Honorable Michael Hanna, House of Representatives

The Honorable John Maher, House of Representatives

Dr. Bruce A. McPherson, Dean of Penn State University College of Agricultural Sciences

The Honorable Jo Ellen Litz, Lebanon County Commissioner

James Cappucci, Wyoming County

George Barnett, Potter County

Larry Kehl, Berks County

Kenneth L. Grimes, Berks County

Sheila Miller, Berks County

Nancy Midla, Washington County

Larry Pettit, Greene County

Dennis H. Satnick, Montgomery County

Gary Smith, Chester County

Pennsylvania Department of Agriculture Bureau of Farmland Preservation

Honorable Edward G. Rendell, Governor

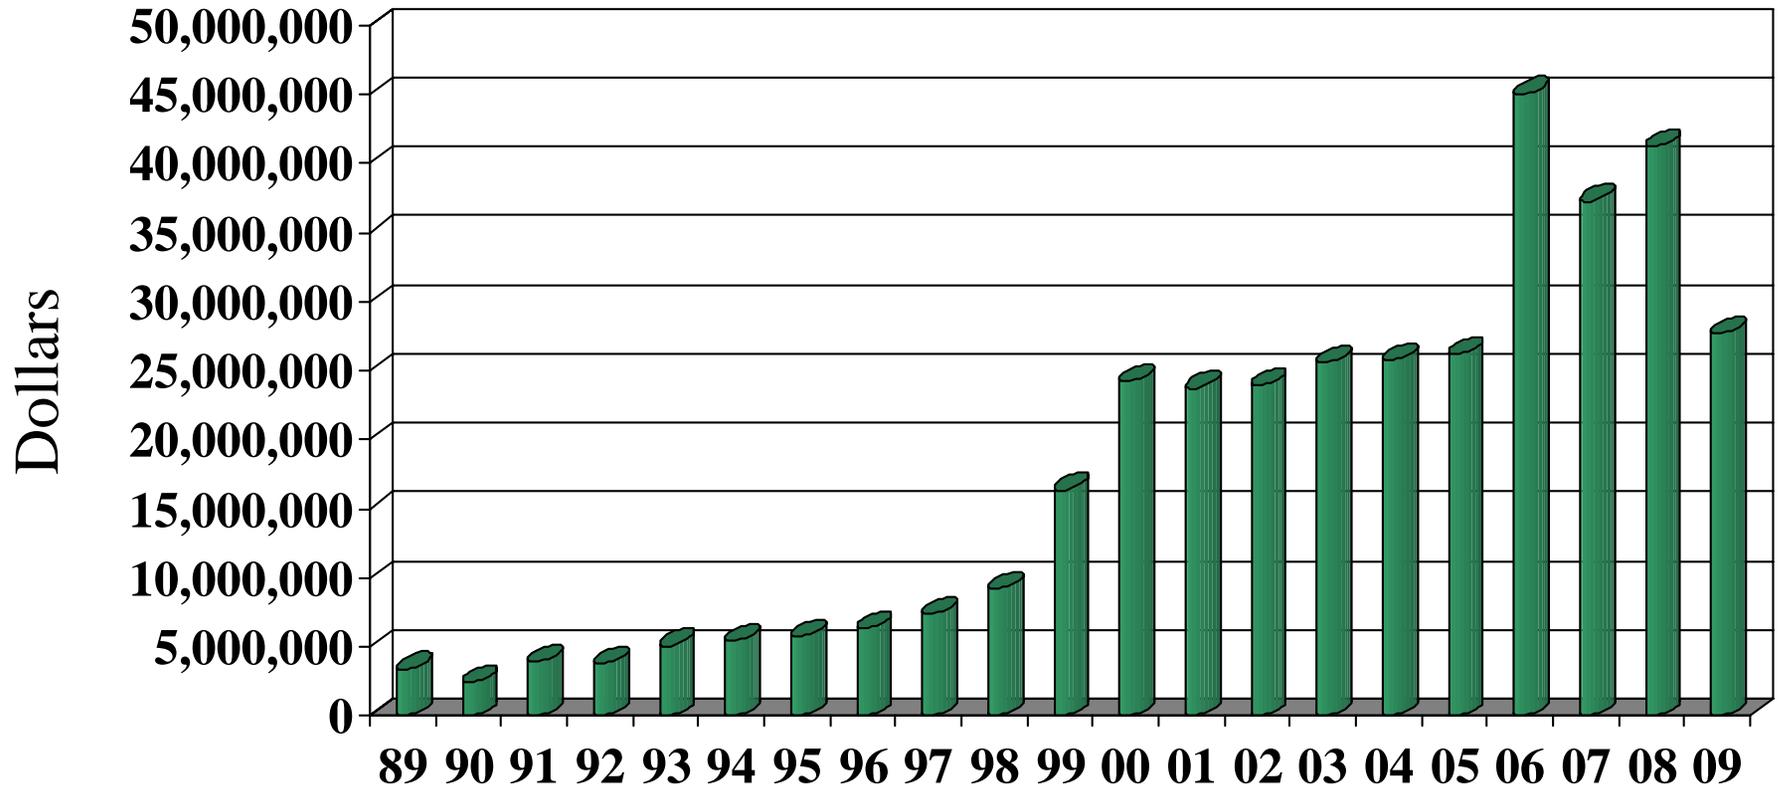

Honorable Russell C. Redding, Secretary, Department of Agriculture

Douglas M. Wolfgang, Director

Staff Members,
Maggie Hanshue
Stephanie Zimmerman
Jason Dunsavage
April Orwig

*INDICATES 6 MONTH EXTENSION GRANTED BY STATE BOARD

LAND TRUST REIMBURSEMENT GRANT PROGRAM

Background: Act 15 of 1999 authorized the State Board to allocate up to \$500,000.00 from the Supplemental Agricultural Conservation Easement Purchase Account for reimbursement grants to be awarded among qualified land trusts. Act 46 of 2006 amended the Agricultural Area Security Law (P.L. 128, No. 43), re-establishing the Land Trust Reimbursement Program by authorizing the State Agricultural Land Preservation Board to allocate \$200,000 per year to the Grant Program. The program will reimburse qualified land trusts up to \$5,000 for expenses incurred in the acquisition of agricultural conservation easements. These expenses include appraisal costs, legal services, title searches, document preparation, title insurance, closing costs, and survey costs.

Objective : To accelerate the Farmland Preservation activity by developing partnerships with Land Trusts.

Status : 12-10-09 State Board Meeting

Land Trusts registered with the State Board (23):

Adopt An Acres, Inc.
Allegheny Land Trust
Berks County Conservancy
Brandywine Conservancy
Central Pennsylvania Conservancy
Centre County Farmland Trust
Countryside Conservancy
Delaware Highlands Conservancy
Farm and Natural Lands Trust of York County
French and Pickering Creeks Conservation Trust, Inc.
Heritage Conservancy
Lancaster Farmland Trust
Land Conservancy of Adams County
Lebanon Valley Conservancy, Inc.
Manada Conservancy
Merrill W. Linn Conservancy
Montgomery County Lands Trust
Natural Lands Trust, Inc.
North Branch Land Trust
Pennsbury Land Trusts, Inc.
Pittsburgh History & Landmarks Foundation
Western Pennsylvania Conservancy
Wildlands Conservancy

Application Reimbursements (11):

Berks County Conservancy	168 acres	\$9,945.30
Brandywine Conservancy	1853 acres	\$107,754.56
Central Pennsylvania Conservancy	849 acres	\$40,981.50
Centre County Farmland Trust	147 acres	\$5,000.00
Delaware Highlands Conservancy	307 acres	\$10,000.00
Farm and Natural Lands Trust of York County	2975 acres	\$156,612.74
Lancaster Farmland Trust	7861 acres	\$614,296.84
Land Conservancy of Adams County	3173 acres	\$128,652.41
Montgomery County Lands Trust	57 acres	\$4,104.27
Natural Lands Trust	197 acres	\$4,988.78
Wildlands Conservancy	69 acres	\$5,978.00
<u>TOTALS</u>	<u>17,656 ACRES</u>	<u>\$1,088,314.40</u>
